Date, Time and Platform

October 29, 2024 10.30 PM Discord

Attendees

Choyon Sarker (CS) Yumna Tasneem (YT) Nuzhat Nairy Afrin (NN) Lamia Binta Latif (LB) Raian Rashid (RR)

Scrum Master

Raian Rashid (RR)

Team Task Updates

Choyon Sarker

- **Completed Yesterday: Partially completed the function implementation and integrated it with the database.**

- **Planned for Today: Finalize the remaining function code, add coding standards, apply the documentation tool, create a new branch, and push the function to Git.**

- **Challenges: No issues encountered.**

Lamia Binta Latif

- **Completed Yesterday: Completed the function code, integrated it with the database, and pushed the changes to the Git branch.**

- **Planned for Today: Implement coding standards and add documentation to the code.**

- **Challenges: Faced an Android version mismatch, which caused difficulties in project synchronization and importing.**

Nuzhat Nairy Afrin

- **Completed Yesterday: Created the function and integrated it with the database.**

- **Planned for Today: Add coding standards and documentation, create a branch, and push the function to Git.**

- **Challenges: Encountered issues understanding specific parts of the source code and struggled to find immediate assistance.**

Yumna Tasneem

- **Completed Yesterday: Function creation completed.**

- **Planned for Today: Add coding standards and documentation, create a Git branch, and push the function.**

- **Challenges: Experienced difficulties adapting the data model class to meet the function requirements for database writing.**

Raian Rashid

- **Completed Yesterday: Function created.**

- **Planned for Today: Apply coding standards, document the code, create a Git branch, and push the function.**

- **Challenges: No issues reported.**

Summary of Impediments

- **Project Synchronization: LB encountered version incompatibilities in Android Studio, affecting project synchronization with other team members.**

- **Source Code Assistance: NN is experiencing difficulties with code implementation and requires additional support.**

- **Data Model Modifications: YT is facing challenges in adapting the data model class to fulfill function requirements for database writing.**

Next Steps

- **Resolve Synchronization Issues: Ensure all team members are on the same Android version to avoid sync and import errors.**

- **Provide Source Code Support: Assign a peer to assist NN with immediate code-related challenges, facilitating smoother progress.**

- **Refine Data Model Adjustments: Guide YT through necessary changes in the data model to ensure compatibility with database writing requirements.**
